Oh!

How does it look? My masterpiece
Woah...

Even by just looking at it I can taste the sweetness...

What? What are you doing? Eat up.
Yum

Sweet... way too sweet...
Ack

Ay, Human! How many more times do you think you're going to eat a meal prepared by an angel?! Eat up while you can!!
I mean..I'm already eating meals prepared by a devil every day so I'm not actually that surprised...
You think he and I are the same?!

BAM!!
Wh.. What was that?

What's going on?

Oh...

Swish

Swoosh

Whish!
What now?!

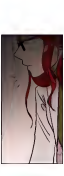
Hmm...

What an elaborate entrance...

Punch

Michael!
Bang

Are you alright?



Ouch...
Oh. Sorry. Were you here?

Hmph.

Why can't you make a normal entrance?!
Sheesh~ So loud You were the one who invited me in the first place

You're not even gonna ask me to have a seat? This isn't how you're supposed to treat your guests.
Huh?
Oh. Have a seat over here for now.

Um...would you like anything? Candy? Chocolate?

No thanks. Just give me a glass of water, please.

Ok. A glass of water...

Huh?

?!
What? Water?! Did she say water?!
Not candy or chocolate??

Here's your water.
Oh. Thank you.

I don't know if she's an angel or a devil,

But she seems the most normal...

Drrrrr

Uh..angel...? Devil...?
..as you can obvious tell from my looks.. I'm an angel.

An angel..!

Hmm, so..
NO WAY!

Miel.

This.

oh

I'm sorry to ruin your fantasies, but I don't have something like that.
Huh?!
Th..then your wings..

Oh..I don't have wings.
Didn't you just see me coming out of there?

Being angels and devils doesn't mean we all have wings. It depends on your department.
Those guys run around on-site so they need wings.

But that's not the case for me.

Department?
This kid is a researcher.
Unlike us who sweat while working in hot weather and tremble in cold weather, she works in comfort.
If you're jealous why don't you become a researcher yourself!

Woah. Research? What sort of research do angels do?

Hm..We do a lot of research...
But of all the different types, my specialty is... "Floss".

Oh~. That. We have one at our house, too. So you're a plant scientist!

Perfect timing. Ours isn't growing very well these days, so you should take a look for us.
